SUMMARY

6+ years of IT Industry experience in the field of Oracle Database Administration. Good experience and Through knowledge in the Implementation and configuration of Oracle Real Application clusters 10g, 11g and 12c on active-active architecture, 10g/12c Grid Control, Recovery Manager (RMAN), Data Guard, Automatic Storage Management (ASM), Advanced Replication, Disaster Recovery.

SKILLS

Administrative, AIX, Apache, ASM, Automate, Automation, Backup, Capacity Planning, Change Management, Interpersonal , Hardware, Concept, CPU, Data Transfer, Database Administrator, Databases, Database, Eclipse, Fashion, Fast, Grants, HP, KSH, Linux, Managing Memory, Windows (95, 98, NT), Migration, Network, Optimization, Oracle 9, Oracle Enterprise Manager, Oracle, and Oracle Enterprise.

WORK EXPERIENCE

Oracle Database Administrator

ABC Corporation - March 2016 – Present

- Implementing the code using the DBCR process and automate the script to deploy the code in a higher environment.
- Using the SRDF process to sync up the data guard and using the SCN backup method to sync up the data guard.
- Setting up the new data guard after the creation of a new database, and do failover and switch over based on the requirement.
- Install, configure and support uni-directional oracle-to-oracle replicated environments utilizing golden gate for reporting.
- Using the golden gate process to masking the sensitive data for reporting.
- Masking the critical sensitive data using oracle masking process and implement the full automation of the masking process using Emcli tool.
- Applying the PSU patch every quarterly for every prod and the lower environment in the database and yearly on the cluster using rolling fashion.

Database Administrator

ABC Corporation - January 2013 – March 2016

- Configure 11g grid infrastructure on two and three-node cluster and creating 11gr2/12c RAC (11. 2. 0. 4) database.
- Implemented fast-start-failover on all critical production database for maximum availability implemented active standby database implemented oracle11g one node RAC technology.
- Based on the issue we go into the depth and do the root cause analysis for our customer and come up with short and long term plan.
- Do various database refresh using RMAN and data pump export utility take the consistent backup of active standby database using the data pump utility.
- Upgrading the database from 11. 2. 0. 2 to 11. 2. 0. 4 applying the PSU patch every quarterly for every prod and lower environment database using golden home concept.
- Coordinate with the various customers and raised the change request plan based on agreed window coordinate with a customer located in a different part of the country like US/Canada and gather the information and prepared the implementation plan and distributed the working among the team members.
- Tuning the SQL query and figure out the right plan for the query and apply the hints.
