Work Experience

Application Developer II

AT&T - May 2010 – Present

- Created dozens of microsoft excel macro enabled files to mechanize and automate many manual processes from data manipulation to complex reports with hidden tabs, pivot tables, charts, creation of external files, etc.
- Using c# windows forms, currently developing several low priority applications to replace microsoft access databases with c# executable applications.
- Using asp. Net, vb. Net, javascript, css, html, and sql server, took on full support of an existing web tool (stars) and enhanced it giving it the ability to automatically look up sales data, account managers, and assigning cases to specific case managers.
- Using coldfusion, vbscript, javascript, css, html, and sql server, obtained requirements, designed, and developed the wholesale contract tracking web intranet application.
- Created hundreds of detailed, complex, cleanly formatted reports and queries using teradata and oracle sql from multiple data warehouses.
- Developed and modified various banner related reports and functions using pl/sql (proc and oracle).
- Worked closely with the database admins to run numerous queries and scripts to assist the business community in analyzing agent performance.

SQL PROGRAMMER

INTRAVEX LLC - June 2007 – March 2010

- Using sql server, created and modified stored procedures customizing and simplifying multiple customer data functions.
- Created dozens of microsoft excel (vba) macro enabled files automating difficult manual processes.
- Using asp. Net, vb. Net, css, and html, supported and helped the development of an in house application used to manage daily reporting, forecasting, and mapping.
- In charge of quality assurance of incoming electronic data interchange (edi) files, creating queries and customer reports using sql query analyzer and biztalk server.
- Co-led team to migrate unix based oracle reports to windows based automated oracle reports.
- Code reviews on proc programs, pl/sql oracle scripts, unix shell scripts.
- Supported connection into oracle database from ms office products (excel).
