ACHIEVEMENTS

★ Streamlined integration processes, reducing deployment time by 30%.

★ Implemented middleware solutions that improved system connectivity across multiple platforms.

PROFESSIONAL SUMMARY

Proficient Integration Architect with 2 years of hands-on experience in developing and executing integration solutions. Expert in leveraging middleware technologies to enhance system connectivity and streamline business processes. Passionate about collaborating with teams to drive successful integration initiatives that align with organizational goals.

WORK EXPERIENCE

Integration Architect
Quantum Solutions LLC
📅 Feb / 2024-Ongoing
📌 Phoenix, AZ

1. Engineered and implemented Tibco middleware solutions, providing technical integration expertise for various projects.
2. Designed a cost-effective integration solution using LVS technology, enhancing functionality and reducing operational expenses.
3. Successfully recovered and established a secure operational environment post-black region incident, ensuring business continuity.
4. Conducted comprehensive testing of Tibco middleware and enterprise applications to ensure optimal performance.
5. Facilitated proof of concepts (POCs) in development environments to validate integration strategies.
6. Coordinated with domestic and offshore teams for code testing and promotion to staging and production environments.
7. Engaged with stakeholders to gather project requirements, leading to innovative solutions that aligned with business objectives.

Integration Architect
Silver Lake Enterprises
📅 Feb / 2023-Feb / 2024
📌 Seattle, WA

1. Led offshore development teams in integrating SAP and non-SAP systems using PI 7.31.
2. Managed design, development, implementation, and testing phases of integration projects, ensuring quality and adherence to timelines.
3. Provided weekly project updates and managed timesheets to track progress and resource allocation.
4. Responsible for integrating SRM, CLM, and ECC systems through PI 7.01, enhancing overall system efficiency.
5. Developed integration architectural documents that guided successful project execution.
6. Applied performance tuning techniques to optimize message and queue handling.
