EXPERIENCE

Boat Mechanic

ABC Corporation - AUGUST 2007 - NOVEMBER 2011

- Disassembled and inspected motors to locate defective parts, using mechanics hand tools and gauges.
- Commenced motors and monitor performance for signs of malfunctioning, such as smoke, excessive vibration, or misfiring.
- Substituted parts, such as gears, magneto points, piston rings, or spark plugs, and reassemble engines.
- Adjusted carburetor mixtures, electrical point settings, or timing while motors are running in water-filled test tanks.
- Repaired engine mechanical equipment, such as power tilts, bilge pumps, or power take-offs.
- Set starter locks and align and repair steering or throttle controls, using gauges, screwdrivers, or wrenches.
- Adjusted generators and replace faulty wiring, using hand tools and soldering irons.

Boat Mechanic

Delta Corporation - 2004 - 2007

- Disassemble and inspect motors to locate defective parts, using mechanics hand tools and gauges.
- Mount motors to boats and operate boats at various speeds on waterways to conduct operational tests.
- Start motors and monitor performance for signs of malfunctioning, such as smoke, excessive vibration, or misfiring.
- Document inspection and test results and work performed or to be performed.
- Replace parts, such as gears, magneto points, piston rings, or spark plugs, and reassemble engines.
- Idle motors and observe thermometers to determine the effectiveness of cooling systems.
- Adjust carburetor mixtures, electrical point settings, or timing while motors are running in water-filled test tanks.
