### **WORK EXPERIENCE**

#### ***Associate Business Objects Developer***

**ABC Corporation - February 2009 - March 2010**

##### *Responsibilities:*

- Medtronic uses Oracle for most relational databases; however the procedure could also be used with other relational DB products.
- The Clinical IT groups now use this method to create individual tables per plate and also per Case Report Form.
- The latter case requires merging plates, so important study team planning is required so variables are appropriately managed across any plates that get combined into a single table.
- Medtronic uses the Data Fax DF Lite utility and the PL/SQL Developer tool to validate the final data structure.
- Responsibilities Involved throughout the complete system Development Life Cycle.
- Involved in Requirements study, interact with the end users and responsible for gathering the reporting requirements.
- Involve with the architecture team for the reporting data mart, data model.
