### SUMMARY

Seeking a personally challenging Compressor Mechanic position utilizing technical experiences learned while working with rotating equipment and their systems. To put knowledge and experience to use to achieve the goals set forth by the company, while I continuously learn and grow.

### CORE COMPETENCIES

Mechanical, Management, Maintenance, Construction, Operations Management, Field Service, Industrial Mechanic.

### PROFESSIONAL EXPERIENCE

#### Compressor Mechanic

**GE Oil And Gas - July 2012 – 2020**

##### Key Deliverables:

- Executed inspections, repairs and assembly of rotating equipment for chemical and petrochemical markets (oil free screw compressors, oil and magnetic bearing turbo expanders DH overhung compressors and more) Lead compressor builds, ensure that procedures are followed and that quality documentation is complete.
- Supported Root Cause Analysis on rotor machining issues which resulted in key corrective actions leading to improved rotor delivery time, saving hundreds of hours per build.
- Analyzed and troubleshoot manufacturing and assembly processes to eliminate quality concerns and improve first pass test yields.
- Trained team members on new processes and procedures.
- Performed various tasks including but not limited to hydro testing, seal leak consumption tests, bearing inspections, fixture checking rotors, and gears to verify engineering CTQs.
- Responsible for magnetic bearing installation, setup, and testing.
- Consecutively ranked number one out of thirteen team members for three years on performance reviews.

#### Compressor Mechanic

**Delta Corporation - 2008 – 2012**

##### Key Deliverables:

- Inspect equipment; Perform scheduled preventative maintenance and rebuilds; Make various repairs to systems as necessary to ensure efficiency.
- Compressed Teflon powder to make a variety of billets to be cut.
- Started power unit to build up specified pressure in the compressor.
- Adjusted controls or set automatic controls to maintain continuous air supply to pneumatic tools and equipment.
