## Concrete Foreman III

[info@qwikresume.com](mailto:info@qwikresume.com) | <https://Qwikresume.com>

To obtain a position as foreman for a concrete masonry crew, while continuing hands on work within the field.

**APRIL 2006 - FEBRUARY 2009**

### **CONCRETE FOREMAN III - ABC CORPORATION**

- Supervised a crew of six to eight employees, meeting every morning to explain daily tasking.
- Arranged sites for work to be done, including ordering trucks for concrete delivery and equipment.
- Labored alongside crew, pouring and finishing concrete slabs, sidewalks, street pavement, and curb and gutter, to complete work in timely manner.
- Reviewed employee timecards on a daily basis and submitted to direct supervisor.
- Prepared daily foremans report, tracking time, finances, and equipment; submitted to supervisor regularly.
- Personally trained new employees via hands on experience.
- Operated skid loaders, backhoes, front-end loaders, and rollers on regular basis.

**2002 - 2006**

### **CONCRETE FOREMAN - ABC CORPORATION**

- Kerkstra precast is a constructing and engineering concrete corporation.
- Working with Kerkstra precast I was a laborer, working with a crew of about 1-2 depending on the demands.
- We would create and develop concrete columns for upcoming projects, also working with engineers to create the rebar layout in the concrete, putting rebar in the concrete ultimately makes the concrete about 15-22 percents stronger because the rebar holds the concrete together much longer.
- Was able to work on my own with limited supervision, working well with all my colleagues.
- How it worked in this company was you do your specific job and that's it, well I'm the type of person that if I see you are struggling and need help with something I will help you, of course I would make sure my job was done first but I'm not going to let someone possibly hurt themselves by doing too much past their level of ability.
- This company did not like that so they had let me go, there reasoning was that my classes took up too much of my time and they needed me there but the human resources worker had told me differently.
- First week in working with this company I had changed the idea of their whole engineering program, changing CAD to CAD44 Skills Used quickly learned the

way this company worked strength engineering construction blueprints.

## **EDUCATION**

Construction Electrician Program - 1975(Albert Lea Area Vo-Tech - Albert Lea, MN)

## **SKILLS**

Blueprint Reading, Equipment Operator, Class A CDL, Concrete Finishing.
