PROFESSIONAL EXPERIENCE

Crude Oil Hauler

ABC Corporation - May 2014 – July 2015

Key Deliverables:

- Started pumps and open valves or use automated equipment to regulate the flow of oil in pipelines and into and out of tanks.
- Verified that incoming and outgoing products are moving through the correct meters and that meters are working properly.
- Read automatic gauges at specified intervals to determine the flow rate of oil into or from tanks, and the amount of oil in tanks.
- Maintained and repaired equipment, or report malfunctioning equipment to supervisors so that repairs can be scheduled.
- Collected product samples by turning bleeder valves, or by lowering containers into tanks to obtain oil samples.
- Performed tests to check the qualities and grades of products, such as assessing levels of bottom sediment, water, and foreign materials in oil samples, using centrifugal testers.
- Prepared calculations for receipts and deliveries of oil and oil products.

Crude Oil Hauler
