Dog Bather

ABC Corporation - 2004 - 2009

Responsibilities:

- My responsibilities here as a dog bather was checking in the dog, which included doing a full check up on the dog in the lobby too see what kind of bath package the dog would benefit from, ex if the dog had dry skin I would recommend the oatmeal bath for his/her skin , checking ears, nails, and teeth as well.
- And sometimes expressing the anal glad as well Accomplishments The impact I had during this job was the fact that I was contributing to the health of dogs/cats in our salon.
- Some dogs were not in the greatest shape when they came in.
- So knowing I could help these pets that made a big impact on me going to work everyday, because it didnt feel like work at all.
- Skills Used Some skills that I used everyday was patience, some dogs were testy, other enjoyed being in the salon.
- Most dogs had a history of biting, growling, and thrashing.
- So when dogs would come in I would have to be patience with them, also another skill was time management, I was taking dogs every half an hour at petsmart so everything was timed so if I had a difficult dog I would take my time with him/her but I would also make sure everything was done correctly with handling the dog.
