Work Experience

Drill Operator III

ABC Corporation - January 1999 – May 2014

- Learned how to scale safely and correctly, in order to minimize the hazards to the people following me.
- Worked with the powder crew in order to help make their job safer and easier.
- Obtained Kentucky General Blasting License.
- Used judgement as to determining if areas were safe to operate in, as well as being able to drill close enough to the ceiling as to have no overhangs, or to not have bootlegs in the faces after the shots were cleared.
- Monitored drilling operations, checking gauges and listening to equipment to assess drilling conditions and to determine the need to adjust drilling or alter equipment.
- Started, stopped, and controlled drilling speed of machines and insertion of casings into holes.
- Selected and attached drill bits and drill rods, adding more rods as hole depths increase, and changing drill bits as needed.

Drill Operator

Delta Corporation - 1996 – 1999

- Run drill for underground fiber optics and gas service.
- with Symmetrical Drilling.
- drill for blasing run reed drill 300 and 345.
