🌟 ACHIEVEMENTS

- 🌟 Successfully designed and implemented groundwater remediation strategies, improving site safety and compliance.
- 🌟 Led a team in assessing geological hazards for a major infrastructure project, resulting in enhanced design recommendations.

👤 PROFESSIONAL SUMMARY

Accomplished Engineering Geologist with 5 years of focused experience in geotechnical investigations and environmental assessments. Skilled in evaluating geological data and implementing sustainable solutions to optimize project outcomes. Dedicated to enhancing safety and compliance standards while delivering high-quality results within tight deadlines.

💼 WORK EXPERIENCE

Engineering Geologist

📅 Jan / 2022-Ongoing

WidgetWorks Inc.

📍 Denver, CO

1. Conducted detailed analyses of groundwater movement and contamination within various geological environments.
2. Designed and supervised the construction of groundwater wells, ensuring compliance with engineering standards.
3. Executed soil remediation projects at contaminated sites, effectively altering groundwater flow dynamics.
4. Evaluated the environmental impact of proposed infrastructure projects, providing actionable insights for mitigation.
5. Investigated and identified groundwater resources for diverse applications, enhancing water management strategies.
6. Developed plans for municipal and private well systems, optimizing groundwater extraction techniques.
7. Assessed contamination levels in groundwater, creating dewatering facility designs to support construction activities.

Engineering Geologist

📅 Jan / 2020-Jan / 2022

Summit Peak Industries

📍 Denver, CO

1. Analyzed geological maps and aerial data to select optimal sites for infrastructure development.
2. Reviewed site information pre-field investigations to enhance design accuracy for construction projects.
3. Assisted in preparing construction documents, including specifications and cost estimates, improving project planning.
4. Provided oversight during construction, ensuring adherence to engineering drawings and specifications.
5. Collected and interpreted soil and geological data, producing comprehensive engineering geology reports.

🎓 EDUCATION

Master of Science in Geology

📅 Jan / 2018-Jan / 2020

University of California, Berkeley

📍 Denver, CO

Focused on geotechnical engineering and environmental remediation techniques.
