SUMMARY

A detail-oriented chemical lab technician with a strong educational background in Gas Chromatography-Mass Spectrometry (GC-MS) supported by 5+ years in an environmental & petroleum laboratory setting.

CORE COMPETENCIES

Lab Technician.

PROFESSIONAL EXPERIENCE

Environmental Lab Technician

ELS - May 2007 – May 2018

Key Deliverables:

- Sampled waste products using fingerprint, cyanide, reactivity with water, and pH tests.
- Ran additional tests including Total Dissolved Solids (TDS), Total Suspended Volatile Solids (TSVS), and Total Dissolved Volatile Solids (TDVS).
- Collected and entered data in MS Excel, printed monthly reports, and managed the filing system.
- Performed quality control of processed wastewater samples through pH, residual chlorine, ammonia, alkalinity, and turbidity testing.
- Prep, label, and test incoming samples Calibrate balances.
- Follow strict SOP for maintenance of lab glassware and sample disposal.
- Performed Infrared Spectroscopy and Gas Chromatography testing on soil, water, and biological samples.

Environmental Lab Technician

Delta Corporation - 2004 – 2007

Key Deliverables:

- Sampled waste products using fingerprint, cyanide, reactivity with water, and pH tests.
- Ran additional tests including Total Dissolved Solids (TDS), Total Suspended Volatile Solids (TSVS), and Total Dissolved Volatile Solids (TDVS).
- Collected and entered data in MS Excel, printed monthly reports, and managed the filing system.
- Performed quality control of processed wastewater samples through pH, residual chlorine, ammonia, alkalinity, and turbidity testing.
- Prep, label, and test incoming samples Calibrate balances.
- Follow strict SOP for maintenance of lab glassware and sample disposal.
- Performed Infrared Spectroscopy and Gas Chromatography testing on soil, water, and biological samples.
