🌟 ACHIEVEMENTS

- 🌟 Successfully optimized ETL processes, reducing data load time by 30%.
- 🌟 Implemented data quality checks that increased accuracy by 25%.
- 🌟 Successfully designed and implemented ETL processes using Informatica to migrate data from legacy systems to a new data warehouse, improving data accessibility by 40%.

👤 PROFESSIONAL SUMMARY

ETL Informatica Developer with 8+ Years of focused experience in the Manufacturing domain, with a strong background in Data warehousing and ETL experience using Informatica Power Center /8.1 on RDBMS databases Worked as an MDM developer, where projects are analyzed, planned, and developed. Maintained documentation of teams technical processes. Worked closely with business users, used latest technologies of Oracle database, MS SQL server database, and job scheduler.

💼 WORK EXPERIENCE

ETL Informatica Developer

📅 May / 2019-Ongoing

WidgetWorks Inc.

📍 Denver, CO

1. Normalizing and de-normalizing the flat files and loading them in SQL server.
2. Creating mappings/sessions and workflows for using Informatica version 9.5.
3. Installing, configuring and upgrading the Informatica powercenter TDM/ILM to 10.1 with all EBFS.
4. Installing and re-configuring and upgrading Informatica Powercenter Suite
5. Using different types of tasks like decision, timer and event initial/bulk load process wait and command to maintain the dependencies between the sessions and load balancing within informatica workflow.
6. Working with various transformations like router, expression, SQL, lookup, normalizer, and aggregator in building complex mapping.
7. Involving in designing the procedures for getting the data from all the source systems to data warehousing system.

ETL Developer

📅 May / 2015-May / 2019

Lakeside Apparel Co

📍 Chicago, IL

1. Designed, constructed, tested and implemented the extraction and transformation programs, processes and cycles for historical and current source data.
2. Created technical specification for supporting enterprise ETL processes and supplemented the system documentation for ETL processes.
3. Developed new and maintained legacy bteq scrips to perform etl data loads to edw from staging tables.
4. Developed unix shell scripts for event waits, wait for files and pre-session tasks.

🎓 EDUCATION

Bachelor of Science in Computer Science

📅 May / 2012-May / 2015

University of Technology

📍 Denver, CO

Focused on software development methodologies, database management, and data warehousing concepts.
