PROFESSIONAL SUMMARY

Detail-oriented Forensic Scientist with over 10 years of experience in DNA analysis, evidence interpretation, and laboratory management. Proven track record in enhancing laboratory efficiency and ensuring compliance with forensic standards.

WORK EXPERIENCE

Lead Forensic Scientist

Dec / 2018-Ongoing

Seaside Innovations

Santa Monica, CA

1. Managed laboratory operations, ensuring compliance with forensic standards and protocols.
2. Developed and validated procedures for DNA analysis, enhancing accuracy and reliability.
3. Implemented a paperless system, streamlining documentation and reducing errors.
4. Led initiatives to eliminate backlog, improving turnaround times for case processing.
5. Validated advanced amplification techniques, resulting in significant cost savings for the agency.
6. Conducted DNA extraction from various biological samples, ensuring high-quality results.
7. Utilized Veriti thermal cyclers for precise amplification, contributing to successful case resolutions.

Forensic Scientist

Dec / 2014-Dec / 2018

Silver Lake Enterprises

Seattle, WA

1. Acted as the primary forensic advisor, providing expert guidance to legal teams.
2. Conducted training sessions on forensic methodologies for staff development.
3. Analyzed and interpreted complex forensic evidence, supporting legal proceedings.
4. Facilitated communication between forensic scientists and legal representatives.
5. Reviewed and improved standard operating procedures for forensic laboratories.

EDUCATION

Master of Science in Forensic Science

Dec / 2011 - Dec / 2014

John Jay College of Criminal Justice

Denver, CO

Focused on advanced forensic techniques, including DNA analysis and toxicology.
