PROFESSIONAL EXPERIENCE

HSE Officer

ABC Corporation - March 2012 – March 2016

Key Deliverables:

- Filled material (aggregate or crushed concrete) must be certified as clean and must be sufficiently compacted to sustain occasional heavy truck traffic.
- Ensured that all meet the minimum safety standards.
- Ensured that all statutory documents are correctly maintained at all times & made available to the Company at all times & their parties on request.
- Carried out periodic HSE training for staff & employees to express commitment, enhance relationships, and encourage them to work in a safe way.
- Recommended effective solutions for building code violations.
- Interpreted building standards to main stakeholders (ex designers, contractors) and anticipates any issues.
- Reviewed employee safety programs to determine their adequacy.

HSE Officer

Delta Corporation - 2011 – 2012

Key Deliverables:

- Health and Safety Officer, Price Battery Facility The Price Battery facility was found to be contaminated with lead, arsenic, and antimony.
- Deteriorating drums containing materials contaminated with lead and arsenic were also found.
- On-site sumps and trenches had high acid levels, prompting a cleanup.
- Some residential surface soils had high lead concentrations, prompting EPA to conduct cleanup activities at those properties.
- EPA started the RI/FS for OU-1 to determine the exact nature and extent of the lead contamination throughout the community.
- Modeling showed that lead emissions may have been deposited throughout the Borough of Hamburg.
- Exide demolished the plant and disposed of its debris by late winter 2008, and began the RI/FS fieldwork for OU2.
