Objective

Over Twenty+ years' experience as a industrial maintenance tech, starting with envelope machines, then packaging machines, slicing machines and textile machines with knowledge of electrical, pneumatic, hydraulic, and troubleshooting.

Skills

Maintenance Technician.

Work Experience

Industrial Maintenance Mechanic

ABC Corporation - October 2005 – October 2010

- Industrial machinery mechanics and maintenance workers maintain and repair factory equipment and other industrial machineries, such as conveying systems, production machinery, and packaging equipment.
- Millwrights install, dismantle, repair, reassemble, and move machinery in factories, power plants, and construction sites.
- Industrial machinery mechanics, also called industrial machinery repairers or maintenance machinists, keep machines in good working order.
- To do this, they must be able to detect and correct errors before the machine, or the products it produces, are damaged.
- Machinery mechanics use technical manuals, their understanding of industrial equipment, and careful observation to discover the cause of a problem.
- For example, after hearing a vibration from a machine, a mechanic must decide whether it is the result of worn belts, weak motor bearings, or some other problem.
- Mechanics often need years of training and experience to be able to diagnose all of the problems they find in their work.

Industrial Maintenance Mechanic

ABC Corporation - 2003 – 2005

- Responsible for repair and maintenance of production machinery including human/machine interface, PLC, and electrical troubleshooting.
- Fabricate machines and equipment utilizing welder, metal saws, drill press and metal break.
- Run and/or modify power supplies utilizing EMT.
- Troubleshoot and modify operational parameters in production machinery.
- Install new production machinery and modify/improve as needed.
- Troubleshoot and repair electric, pneumatic, and hydraulic systems.
- Perform preventative maintenance checks and services..
