PROFESSIONAL SUMMARY

Proficient Informatica Administrator with 2 years of experience in managing ETL processes and enhancing data workflows. Skilled in configuring Informatica PowerCenter and ensuring seamless integration with various data sources. Focused on improving data quality and operational efficiency while adhering to compliance standards. Looking to apply my technical expertise to facilitate data-driven decision-making.

WORK EXPERIENCE

Informatica Administrator  Mar / 2024-Ongoing  Santa Monica, CA
Seaside Innovations

1. Installed and configured Informatica PowerCenter g.x for efficient ETL processes.
2. Managed daily administration tasks including user and folder creation, and configuring database connections.
3. Monitored infrastructure availability to support development and troubleshooting activities.
4. Conducted capacity planning and ongoing resource monitoring to ensure optimal performance.
5. Proactively scaled resources based on project demands and usage patterns.
6. Exported and imported Informatica objects such as mappings and workflows to streamline project transitions.
7. Administered repository and integration services, ensuring system reliability.

Junior Informatica Administrator  Mar / 2023-Mar / 2024  Seattle, WA
Silver Lake Enterprises

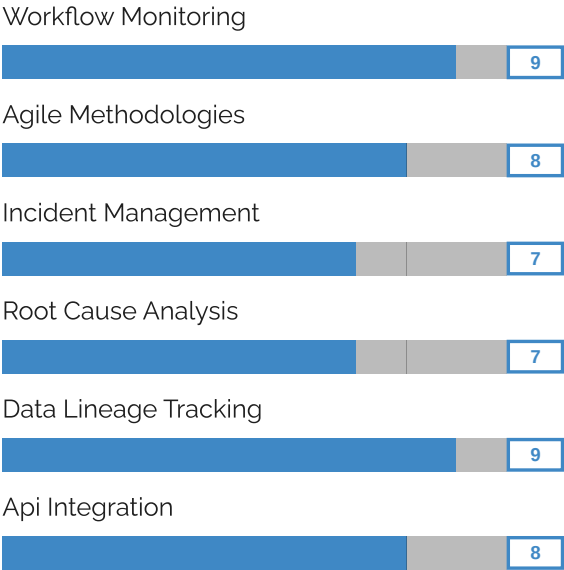

1. Upgraded Informatica from version 9.5 to 9.6, optimizing service configurations in PowerCenter.
2. Established and validated a robust batch processing framework for ETL operations.
3. Performed user management tasks, assigning appropriate permissions and monitoring access levels.
4. Scheduled regular backups for domain and repository data to protect against data loss.
5. Migrated ETL objects between different environments, ensuring successful transitions and version control.
6. Automated routine administrative tasks using shell scripts and command-line utilities.

EDUCATION

Bachelor of Science in Computer Science  Mar / 2022  Mar / 2023  Denver, CO
University of California

Focused on software development and data management principles.
