Lead Information Security Engineer with over 8 years' experience focused on supporting Computer Forensics, network operations, Information Assurance, software assurance, IT Cyber Security monitoring, IT risk assessment, system analysis, requirements gathering, and customer support.

## Skills

Security, Oracle Database/SQL Security, Anti-Virus Products, Security Information Management (SIM)

## Work Experience

### Lead Information Security Engineer

**SPLUNK** - 2015 - 2019

- Act as a security engineer to support Splunk architecture, deployment and content development.
- Perform complex deployments of Splunk and its components on a large scale enterprise.
- Perform data integration, data transformation, field extraction, event parsing, data preview and Apps management of Splunk platform.
- Develop custom correlations to provide in-depth monitoring and alerting of critical assets.
- Technical point of contact for the Incident Response Team and Engineering Team to discuss and implement use cases for detection of threats and to monitor system health.
- Develop and maintain reports and alerts for Information Security operations and other business units.
- Create data retention policies and platform index administration, maintenance and optimization.

### Information Security Engineer

**ABC Corporation** - 2011 - 2015

- Provided analysis and support for firewalls, routers, networks, and operating systems, such as McAfee Web Gateway, ISA servers, and Sidewinders.
- Monitored, and administered, user access processes to ensure the operational integrity of security systems via Active Directory for Windows Server 2003.
- Monitored security events and alerts across TSA networks using ArcSight Logger.
- Provided technical support to assess and enforce TSA-mandated security policies.
- Reviewed and recommend the installation, modification or replacement of security components.
- This is Dummy Description data, Replace with job description relevant to your current role.
