PERSONAL STATEMENT

A technically solid and multi-disciplined engineer with experience as a front-line department manager in the 24/7 Union Manufacturing Environment. Innovative strategist with proven ability to influence culture (Safety and People), meet project deadlines, manage material procurement, and meet manufacturing requirements, all while exceeding customer expectations. Strong instrumentation and controls knowledge including PLC programming, HMI, instrumentation, DCS, and integration.

WORK EXPERIENCE

Instrumentation Supervisor

ABC Corporation - July 2011 - January 2013

Responsibilities:

- Supervised and trained instrumentation technicians and electricians at the Whiting division of the company.
- Assigned job duties, provide radiation training, administered policies/procedures/counseling, and mentoring in the everyday activities and people.
- Coordinated with the mill/maintenance/engineering managers on downtime and mill projects.
- Staffed, tooled up, and oversaw all loop functional checks and completed all system commissioning.
- Completed calibration of all instrumentation and supported installation, inspection, commissioning.
- Completed construction through a startup.
- Converted construction documents into start-up operational maintenance procedures, PM programs, and calibration schedules.
