Work Experience

Insulation Installer III

ABC Corporation - August 2011 - May 2015

- Conduct full install of insulation in residential or commercial buildings using different materials of insulation including batts blown fiberglass or sealant foam.
- Look through work orders to ensure correct material is being used.
- Properly write down the correct amount of product being used to ensure inventory count is correct.
- Have formal contact with contractors to create future job opportunities.
- Communicate with the general contractor or superintendent to determine the next process of production.
- Assist production manager with information on worksite stages including etas, follow-ups on production and job completion.
- Walk worksites to determine if the job is ready to begin production.

Insulation Installer

ABC Corporation - 2008 - 2011

- Finch interpreted and worked from plans, involved drawings, and sketches.
- He would fit, wrap, or attach insulating materials to structures or surfaces, using hand tools or wires, following blueprint specifications.
- Mr.
- Finch would have to evenly distribute insulating materials into small spaces within floors, ceilings, or walls, using a blower and hose attachments.
- Some of his duties included measuring and cut insulation for covering surfaces, using a tape measure, handsaw, knife or scissors, filling blower hopper with insulating materials, and moving controls, buttons, or levers to start blower and regulate the flow of materials through the nozzle.
