

ROBERT SMITH

Junior Sql Server Developer I

info@qwikresume.com | [LinkedIn Profile](#) | [Qwikresume.com](#)

Over 8 years of strong experience in Software Design, Development, Analysis, Testing with Data mart, Data Warehouse, Data modeling, Stored Procedure/TSQL coding and Business Intelligence tools. Expert in MS SQL Server suite of products like SSRS, SSAS and SSIS of MS SQL Server 2005. Highly Proficient in the use of T-SQL for developing complex Stored Procedures, Triggers, Functions, views and Indexes.

EXPERIENCE

Junior Sql Server Developer I

ABC Corporation - MAY 2008 - APRIL 2010

- Installed and configured SQL Server 2005 successfully on Windows Server 2003.
- Created other database objects like tables, views, Stored Procedures, User Defined Functions, Triggers and indexes.
- Error handling using Try-Catch Block.
- Developed Database Triggers to enforce Data integrity and additional Referential Integrity.
- Maintained the physical database by monitoring performance, integrity and optimize SQL queries for maximum efficiency using SQL Profiler.
- Maintained the table performance by following the tuning tips like normalization, creating indexes and collect statistics.
- Automated Stored Procedures to load data into staging and production environments in a timely manner using SQL Server Agent.

Junior Sql Server Developer

Delta Corporation - 2003 - 2008

- Design, create, maintain and manage Enterprise Data Warehouses (EDW), data marts, Operational Data Stores (ODS) Extract Transform Load (ETL) solutions, XML, indexes, T-SQL and data manipulation scripts, stored procedures, views, functions, reports and forms.
- Apply DoD data standards to all software applications and database data elements, ensuring logical data models are fully attributed, normalized, and included in a data dictionary.
- Create data dictionaries for all database efforts that include the following information for each functional data element the logical data element name, its definition that describes the meaning and the context of the data element in the system, the domain of the data element (the allowable values), the data type, length, and unit of measure.
- Assist in developing SOF Enterprise metadata standards and document all meta tags, where applicable, in an XML Schema (XSD file) and post to the Metadata Registry after being vetted through a

configuration management process.

- Provide consulting services and technical support for database creation, modification, testing, administration, monitoring, tuning, backup, and recovery.
- Ensure maximum use of SQL Server Integration Services (SSIS) and SQL Server reporting Services (SSRS) for the integration and delivery of information.
- This is Dummy Description data, Replace with job description relevant to your current role.

EDUCATION

- Bachelor of Technology in Technology - (JNT University)

SKILLS

Management, Organizing.
