## SUMMARY

Laboratory Manager with 4 years of experience as a Lab Chemist, and over 1-year experience as an Assistant Laboratory Manager. Areas of expertise include performing accurate and precise results to clientele per SOP training. Train lab chemists on SOP(AOAC) HPLC and Mass Spectroscopy testing. Continually working with other management to spear-head new avenues of future testing, while still providing excellence in current testing.

## SKILLS

Phlebotomy, Specimen Processor.

## WORK EXPERIENCE

### Laboratory Chemist

ABC Corporation - May 2014 - November 2014

- Act as research support by conducting wet chemistry and size exclusion chromatography on polyolefins in their pre and post-production phases.
- Contribute to the implementation of laboratory methods that increased the efficiency of analytic testing procedures.
- Assist in updating the laboratory setting by providing recommendations for the acquisition of new lab equipment leading to new method development.
- Assist in plant support and quality control by utilizing analytic techniques in order to identify causes of plant and customer material defects.
- Wrote and implemented SOPs as part of the Continuous Quality Improvement program.
- Completed sampling, testing, and documentation for both incoming and outgoing materials.
- Conduct independent projects, assigned or approved by the supervisor, in order to enhance personal performance and establish reports that are used as data resources within the company.

### Laboratory Chemist

Delta Corporation - 2012 - 2014

- Act as research support by conducting wet chemistry and size exclusion chromatography on polyolefins in their pre and post production phases.
- Contribute to the implementation of laboratory methods that increased efficiency of analytic testing procedures.
- Assist in updating the laboratory setting by providing recommendations for the acquisition of new lab equipment leading to new method development.
- Assist in plant support and quality control by utilizing analytic techniques in order to identify causes in plant and customer material defects.
- Conduct independent projects, assigned or approved by the supervisor, in order to enhance personal performance and establish reports that are used as data resources within the company.
