LANGUAGES

English 80%   **Arabic** 80%   **German** 80%

ACHIEVEMENTS

- ★ Implemented a network redesign that improved data throughput by 30%.
- ★ Led a team in troubleshooting and resolving network outages, reducing downtime by 25%.
- ★ Optimized existing network configurations, resulting in a 20% increase in efficiency.

PROFESSIONAL SUMMARY

Innovative Lead Network Engineer with 2 years of dedicated experience in developing and optimizing network infrastructures. Skilled in troubleshooting and enhancing connectivity reliability while ensuring adherence to security protocols. Eager to leverage technical expertise to drive impactful projects and foster team collaboration in dynamic environments.

WORK EXPERIENCE

Lead Network Engineer
📅 Feb / 2024-Ongoing
Quantum Solutions LLC
📍 Phoenix, AZ

1. Analyzed network architecture to enhance system performance and support mission-critical operations.
2. Developed routing specifications for tactical radio systems, improving communication protocols.
3. Created a detailed System Development Life Cycle (SDLC) to streamline network integration processes.
4. Coordinated troubleshooting efforts to ensure optimal network connectivity.
5. Verified configurations in operational test environments to assess system compatibility.
6. Designed intra-vehicle network diagrams to illustrate system integration.
7. Collaborated with teams to implement data traffic solutions across various communication systems.

Lead Network Engineer
📅 Feb / 2023-Feb / 2024
Lakeside Apparel Co
📍 Chicago, IL

1. Expanded and managed technology operations to enhance network performance.
2. Developed engineering packages for the installation of optical network equipment.
3. Conducted site surveys to assess equipment and power requirements.
4. Provisioned and isolated faults in core network equipment.
5. Provided tier III support for various network technologies including Cisco and Lucent systems.
6. Co-developed a comprehensive training course on frame relay technologies.

EDUCATION

Bachelor of Science in Network Engineering
📅 Feb / 2022 – Feb / 2023
Tech University
📍 Toronto, ON

Focused on advanced network design and security protocols.
