WORK EXPERIENCE

Load Planner III

ABC Corporation - January 2008 - February 2015

Responsibilities:

- Determine most efficient and economical route and mode of OTR transportation.
- Build and tender LTL and TL shipments to preferred carriers using logistics management system.
- Utilize optimization software and determine the most cost effective routes and freight movement, which fully meet the customer service requirements while maximizing profit.
- Negotiate with contract carriers on spot quotes and support contract negotiations.
- Assist with new and existing carrier development.
- Initiate action plans for non-compliant carriers and monitors freight lanes that are not within cost and/ or service parameters.
- Publish daily and weekly department metrics, which includes reviewing previous days loads for success and failures.

Load Planner

ABC Corporation - 2006 - 2008

Responsibilities:

- Planned bulk shipments for the west coast and Canadian plants and distribution centers.
- Participated in a joint effort with other team members to improve the BSP (Bulk Scheduling Program).
- Analyzed the advantages of adding 6 compartment trailers to carrier fleet, which led to the addition of such equipment and increased freight utilization.
- Encouraged change of KPIs to minimize mileage on carrier fleets.
- Managed transfer freight, billing and other various tasks.
- Created reorder point and safety stock logic to assist development of a predictive ordering system.
- Successfully kept both freight utilization over 95% and delivered customer orders in 7 days or less across 5 different fleets..
