

PROFESSIONAL SUMMARY

Dynamic Master Control Operator with 2 years of experience in broadcast operations. Skilled in monitoring transmission quality, troubleshooting equipment issues, and ensuring compliance with FCC regulations. Adept at preparing programming for on-air playout and collaborating with engineering teams. Committed to maintaining high standards in broadcast performance and operational excellence.

WORK EXPERIENCE

Master Control Operator

May / 2024-Ongoing

Blue Sky Innovations

📌 Chicago, IL

1. Managed the broadcasting of TV commercials and programming, ensuring adherence to schedules and quality standards.
2. Performed detailed analysis of transmitter performance, identifying and resolving issues proactively.
3. Collaborated with engineering to install and maintain broadcasting equipment, enhancing overall functionality.
4. Executed preventive maintenance on broadcasting equipment, ensuring optimal performance and reliability.
5. Controlled broadcasting operations, adjusting devices to maintain signal integrity.
6. Verified logs of playlists and programming, ensuring accuracy in on-air content.
7. Set up and calibrated dish antennas to achieve desired signal quality.

MASTER CONTROL OPERATOR

May / 2023-May / 2024

Silver Lake Enterprises

📌 Seattle, WA

1. Conducted technical oversight of local programming, ensuring compliance with broadcast standards.
2. Managed on-air switching and maintained FCC log quality control regulations.
3. Executed local commercial break switching, optimizing viewer experience.
4. Operated multiple channels including XUPN Channel 13 and KBNT Univision Channel 17 master control.
5. Recorded and digitized local commercials into the Virtual Recorder System for efficient playback.
6. Captured satellite feeds and local broadcasts, ensuring high-quality transmission.

EDUCATION

Bachelor of Arts in Broadcasting

May / 2022-May / 2023

State University

📌 Seattle, WA

Focused on media production and broadcast technology, gaining hands-on experience in various broadcasting roles.

SKILLS

Broadcast Operations

Quality Control Monitoring

Equipment Troubleshooting

Operational Coordination

ACHIEVEMENTS

- Enhanced broadcast quality by implementing a new monitoring system, reducing transmission errors by 20%.
- Successfully managed on-air transitions for over 100 live broadcasts, ensuring seamless programming.
- Collaborated with engineering to upgrade broadcast equipment, improving operational efficiency by 15%.
