## Skills

Molder, Forklift Driver.

## Work Experience

### Molder/Representative

#### ABC Corporation - 2006 - 2014

- Manufacturer of a multitude of products and accessories for the ground supports the airline industry.
- Responsible for the setup, operation, and tending of plastic molding machines to mold thermoplastic products.
- Observed continuous operation of automatic machines to ensure that products meet specifications and to detect jams or malfunctions, making adjustments as necessary.
- Measured and visually inspected products for surface and dimension defects to ensure conformance to specifications.
- Positioned and secured workpieces on machines, and start feeding mechanisms.
- Turned valves and dials of machines to regulate pressure, temperature, and speed and feed rates, and to set cycle times.
- Removed finished or cured products from dies or molds, using hand tools, air hoses, and other equipment, stamping.

### Molder

#### Custom Electronics, Inc. - 2005 - 2006

- Set up molds with capacitor packs to be molded, encapsulated the packs with epoxy to bake, remove when done baking, clean molded packs and set up for the next set.
- check dimensions with calipers to be sure the part is within specifications.
- As with any job I do I became proficient at my job so I can produce optimum amount of parts with minimal tear down to have to rebuild.
- on many orders the company has behind on for some time I have worked extremely hard to get the orders on time and ahead in some cases.
- Skills Used attention to detail, very precise as the parts to be molded need specific dimensions inside the molds to be molded.
- became proficient and managed time to be able to run several different molds and keep orders on time, get ones caught up if behind.
- all parts required reading and understanding blueprints..
