SUMMARY

Motivated and highly productive NC Programmer professional with a programming background. Detail-oriented with strong skills in multi-tasking and efficient management of day-to-day office operations. Adept at building and maintaining effective working relationships with co-workers and clients through outstanding interpersonal skills.

CORE COMPETENCIES

Ability to Read and Interpret Design Blueprints, Strong Attention to Detail.

PROFESSIONAL EXPERIENCE

NC Programmer

ABC Corporation - 1999 – May 2000

Key Deliverables:

- Created a large number of subroutines in UGs Grip programming language.
- Able to program and troubleshoot complex machining processes on multiaxial/multifunction CNC machines.
- Able to work in a matrix-based organization and take initiative to contact and coordinate with other groups when a problem solution so requires.
- Determined methods, cutter types, and cutting parameters depending on a variety of materials (composites, epoxies, steel, aluminum, etc.) and design specifications.
- Designed 3-D computer models, drawings, and specifications for the fabrication of fixturing elements.
- Created 3-5 axis tool paths utilizing Unigraphics CAD/CAM software.
- Provided input in production tracking software.

NC Programmer

Delta Corporation - 2010 – 2015

Key Deliverables:

- Took engineering drawings and 3-D models of parts and create programs to make these parts on an NC turret punch press using software called Striker.
- Took engineering blueprints and drafted them out in Auto Cad Mechanical to create a DXF of these parts in 2D.
- Designed parts and drafted them out and in 3D using Auto Cad Inventor.
- Created full prints that have complete dimensions and scaling.
- Provided technical guidance to his/her group.
- Provided input on selection, placement, job evaluation, performance, and appraisals.
- Supported the Machine Shop and Assembly & Test areas by coordinating the manufacturing Engineering group activities.
