

ROBERT SMITH

Nuclear Power Plant Operator

Phone: (0123)-456-789 | Email: info@qwikresume.com | Website: Qwikresume.com

SUMMARY

Six years of experience as a highly trained and operationally experienced nuclear technician with a documented track record of success as an innovative problem solver who thrives in a high tempo operational environment. Maintained and operated equipment in a naval nuclear submarine to produce steam for propulsion and generation of electrical power and coordinates operation of auxiliary equipment including pumps, turbines, boilers, water purification, condensers, and other associated equipment.

CORE COMPETENCIES

Electrical design and engineering, Mechanical design.

PROFESSIONAL EXPERIENCE

Nuclear Power Plant Operator

ABC Corporation - 1993 – 1993

Key Deliverables:

- Performed and supervised corrective and preventative maintenance actions and testing of propulsion plant systems during both shipyard maintenance availabilities and operational conditions.
- Inspected final products for Quality Assurance cleanliness controls to ensure the proper operation of steam and reactor plant systems.
- Developed maintenance schedules to ensure the timely and efficient completion of preventive and corrective maintenance.
- Highly skilled in use of schematics, blueprints, and technical manuals to isolate and diagnose faults in various systems.
- Performed calibration on a variety of high and low pressure instruments for periodic maintenance and testing.
- Conducted Quality Assurance audits of technical documents and controlled material storage.
- Practiced proper safety precautions while performing work to include proper ear and eye protection, work near rotating equipment, work near high temperature surfaces, and radiological controls.

Nuclear Power Plant Operator

Delta Corporation - 1987 – 1990

Key Deliverables:

- Maintenance and operation of a pressurized-water nuclear power plant, including an in-depth understanding of reactor core nuclear principles; heat .
- Knowledge sets include nuclear, nuclear engineering, nuclear power reactor.
- Led team of 5 operators through mission critical power plant operations, maintenance, and casualty drills.

- Assisted in ongoing evaluations to ensure reactor power demands and maintenance needs were expeditiously met.
- Solidified comprehensive understanding of reactor, mechanical, and electrical theory involved in the operations of nuclear reactors.
- Qualified in the following watches Chief Reactor, Reactor Auxiliaries, Turbine Generator, Feed Control, Charging Station, and Feed Pumps, as well as .
- Leading Engineering Lab Technician.

EDUCATION

- MS
