Practical Nursing Instructor **Delta Corporation - 2010 - 2014**

Responsibilities:

- As full-time non-tenured instructor, provided nursing education to 20-40 students in classroom, clinical, skills lab, and hospital environments.
- Coursework included medical / surgical nursing with focus on perioperative nursing, endocrine, lymphatic, and immunological systems, and maternal child health.
- Facilitated in-depth discussions regarding nursing profession guidelines and best practices; ensured that students received timely information on the latest safe practices, required skills, and specific disease processes.
- Collaborated closely with School of Nursing Director to develop curriculum content and course outlines that supported established student education objectives.
- Worked with nursing service professionals at hospital level (e.g., staff nurses, Directors of Nurses, Nurse Managers) to help students gain real-world experience; matched students with patients and observed / monitored student performance.
- Leveraged evidence-based practices to help students apply classroom theory to real-world clinical situations.
