SKILLS

Microsoft Office Suite, Martial Arts, Handcuffing Techniques, Hand/Power Tools, OC Spray.

WORK EXPERIENCE

Private Security Officer

American Star Security - July 2014 - 2020

- Worked a steady full-time post at a science research building named Synthetic Genomics, located in La Jolla, CA where monitored the cryo tanks, cold rooms, and freezers to assure that the research does not spoil due to power outages or temperatures dropping below acceptable levels.
- Monitored the CCTV cameras, assuring that no one is trying to get into the building or the greenhouse.
- Worked the grave shift, was in knowing that I was saving experiments from having to be thrown out and begun again from scratch.
- Used De-activating and Activating Alarm systems, as there were times that an area that is alarmed needed to be patrolled so would have to De-activate the alarm and then re-activate it once left again; safe patrol techniques; and CCTV monitoring skills.
- Learned to be an effective lone worker as this was a one man security detail.
- Responsible for walk inside and outside of the property and make sure nothing is broken into or out of the ordinary.
- Monitored and authorized entrance and departure of employees, visitors, and other persons to guard against theft and maintain security premises.

Private Security Officer

Delta Corporation - 2012 - 2014

- I worked as a healthcare security officer at San Diego County Psychiatric hospital.
- My duties included monitoring CCTV cameras while posted at the Guard Station and at the guard station, I was required to process self-admit patients which entailed doing a search of their person and belongings, bagging their belongings and then escorting them into the facility and remain with them till theyre checked in.
- Their belongings were handed in to hospital staff.
- Had a radio and was part of a three man security team.
- When not at the desk, one security officer would patrol the facility, inside and out and report anything suspicious or assist nurses with any emergency patients while the other officer was to remain in the emergency room unit.
- However, all guards, except the guard station guard, were to drop what theyre doing and run to assist nursing staff with subduing an out of control patient, when the code is announced over the guard station PA system, by the guard there who was alerted by the landline phone.
- Therefore, I also have experience with properly taking down and restraining persons without causing injury to them.

EDUCATION

Certificate of Study in Criminal Investigation - (San Diego Miramar College - San Diego, CA)
