PROFESSIONAL SUMMARY

Dynamic Release Engineer with 2 years of experience in automating software builds and deployments across diverse environments. Proficient in utilizing CI/CD tools like Jenkins and Maven, alongside implementing best practices in Software Configuration Management. Committed to enhancing operational efficiency through strategic collaboration and innovative automation solutions.

WORK EXPERIENCE

Release Engineer
Maple Leaf Consulting

📅 May / 2024-Ongoing
📍 Toronto, ON

1. Facilitated multiple software releases by collaborating with development teams and managing release schedules.
2. Created and updated Build Definitions, ensuring alignment with project requirements and timelines.
3. Maintained MS Build and PowerShell files for automation of .NET applications.
4. Coordinated production deployments, ensuring smooth transitions and minimal downtime.
5. Developed build and deployment scripts using Jenkins and Maven for efficient environment transitions.
6. Optimized build processes, contributing to a significant reduction in build times.
7. Monitored and resolved build issues, ensuring a stable development environment.

Release Engineer
Crescent Moon Design

📅 May / 2023-May / 2024
📍 Portland, OR

1. Provided centralized software configuration management for enterprise applications in high-availability environments.
2. Administered build and deployment processes using tools like Jenkins, Maven, and Ant.
3. Monitored software updates and maintained version control through Subversion and Git.
4. Automated deployment of J2EE applications, enhancing delivery speed and reliability.
5. Evaluated and implemented build automation tools, improving operational efficiency.
6. Configured services and automated manual processes, ensuring consistency across environments.

EDUCATION

Bachelor of Science in Computer Science
State University

📅 May / 2022-May / 2023
📍 Chicago, IL

Focused on software engineering principles and practices, with a strong emphasis on automation and systems management.

SKILLS

Continuous Integration	Version Control Systems	Continuous Integration Tools	Build Automation Tools

ACHIEVEMENTS

⭐ Successfully automated the build and deployment process, reducing release time by 30%.

⭐ Implemented CI/CD pipelines, improving deployment frequency by 50%.

⭐ Developed robust scripts for build automation, enhancing reliability and efficiency.
