PROFESSIONAL SUMMARY

Skilled RF Technician with 7 years of experience in the installation, maintenance, and troubleshooting of complex RF systems. Proficient in utilizing advanced testing equipment and methodologies to ensure optimal system performance. Dedicated to enhancing operational efficiency and reliability while collaborating effectively within multidisciplinary teams.

WORK EXPERIENCE

Rf Technician Apr / 2020-Ongoing
Quantum Solutions LLC Phoenix, AZ

- 1. Stay updated on advancements in RF technology and techniques.
- 2. Conduct testing and analysis of the network to guarantee continuous coverage, integrity, and quality.
- 3. Diagnose and resolve internal alarms, overseeing outage troubleshooting and significant project execution.
- 4. Supervise technicians while facilitating training and development in RF technologies.
- 5. Act as a key liaison between management and technical teams to ensure critical network elements operate efficiently.
- 6. Support the development of RF training materials and programs.
- 7. Perform scheduled maintenance tasks regularly, intervening as necessary to uphold system integrity.

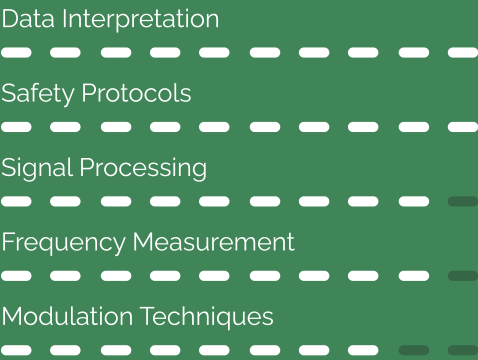

RF Technician Apr / 2018-Apr / 2020
Silver Lake Enterprises Seattle, WA

- 1. Test, tune, and troubleshoot high-power RF and microwave systems used in radars and communications.
- 2. Work with systems that include high-power amplifiers, low-noise amplifiers, and digital control components.
- 3. Manage frequency ranges from 1.125GHz to 20GHz, ensuring output power meets specifications.
- 4. Conduct power measurements and tuning for input/output return loss, gain, and phase adjustments using VNA.
- 5. Document test results, failure reports, and ECOs to maintain accurate project records.

EDUCATION

Associate of Applied Science in Electronics Apr / 2016 - Apr / 2018
Tech Institute of Technology Toronto, ON
Focused on electronics principles, RF communication, and troubleshooting techniques.
