# **EVELYN WHITE**

## Swiss Screw Machine Operator

## **PROFESSIONAL SUMMARY**

Driven Swiss Screw Machine Operator with 7 years of expertise in running and maintaining multi-spindle machines. Adept at making precise adjustments and conducting thorough quality inspections to meet stringent specifications. Proficient in blueprint analysis and skilled with precision measurement tools. Passionate about enhancing production efficiency while upholding safety and quality standards.

## WORK EXPERIENCE

#### Swiss Screw Machine Operator

Mar / 2020-Ongoing

Blue Sky Innovations

Thicago, IL

- 1. Adjusted machine settings for optimal performance and quality output.
- 2. Conducted routine maintenance and troubleshooting to minimize downtime.
- 3. Inspected final products for quality assurance and adherence to specifications.
- 4. Utilized precision tools such as calipers and micrometers for accurate measurements.
- 5. Monitored production processes, making necessary adjustments to enhance productivity.
- 6. Collaborated with engineering teams to improve machine setups and reduce waste.
- 7. Documented production data for quality control and process improvement initiatives.

## Screw Machine Operator

mar/2018-Mar/2020

♣ Chicago, IL

Lakeside Apparel Co

- 1. Operated and maintained Swiss-style screw machines for high-volume production.
- 2. Performed setup and calibration of equipment to ensure precision machining.
- 3. Trained new employees on machine operation and safety protocols.
- 4. Monitored production runs, addressing issues promptly to maintain quality.
- 5. Participated in continuous improvement projects to optimize manufacturing processes.
- 6. Maintained inventory of tools and supplies for efficient operations.

# **EDUCATION**

# Associate of Applied Science in Machine Tool Technology

Mar/2016-Mar/2018

Central Community College

♣ Chicago, IL

Focused on advanced machining techniques and CNC programming.

# **SKILLS**

Metalworking Skills Parts Inspection Time Management

**Cnc Programming** 

## **ACHIEVEMENTS**

Reduced production downtime by 15% through effective machine maintenance.

Achieved a 98% quality compliance rate by implementing rigorous inspection protocols.

Streamlined tool change processes, decreasing setup time by 20%.
