💡 SKILLS

Lean Manufacturing Techniques

Autocad Design And Drafting

Agile Methodologies

Oracle Database Management

Solaris Operating System Administration

Unix Systems Management

🚀 INTERESTS

🔧 DIY Projects ✂️ Crafting

🧘 Meditation 🏛️ History

👊 STRENGTHS

🌿 Humility 💡 Innovation

👁️ Insightfulness ✅ Integrity

🗣️ LANGUAGES

🌟 ACHIEVEMENTS

🌟 Streamlined testing processes, reducing cycle time by 30% through efficient test case management.

🌟 Led a cross-functional team to implement a new quality inspection protocol, improving defect detection rates by 25%.

👤 PROFESSIONAL SUMMARY

Seasoned Senior Engineer with 7 years of expertise in industrial automation and process validation. Adept at designing and executing test cases for complex systems, ensuring compliance and performance optimization. Committed to driving innovation and excellence in engineering projects, leveraging a solid background in quality assurance and stakeholder collaboration.

💻 WORK EXPERIENCE

Senior Engineer I

📅 Feb / 2021-Ongoing

Seaside Innovations

📍 Santa Monica, CA

1. Understand and validate QCS processes in the paper and metal industries, ensuring adherence to specifications.
2. Select test cases for various testing cycles, including Functional Integration Testing and Performance Capability Testing.
3. Prepare test setups, including server nodes and operator stations with diverse configurations.
4. Configure network switches to meet testing topology requirements.
5. Execute functional and non-functional test cases for comprehensive system evaluation.
6. Conduct performance and capacity tests following established guidelines.
7. Update test results in the quality center and report defects with detailed debugging information.

Senior Engineer (Contractor)

📅 Feb / 2018-Feb / 2021

Lakeside Apparel Co

📍 Chicago, IL

1. Represent the Quality Assurance function in product development activities, contributing to Design FMEAs and risk analysis.
2. Establish quality inspection procedures and sampling plans for production and finished devices.
3. Support Incoming Quality Control inspections and develop inspection fixtures for enhanced testing.
4. Conduct supplier audits and manage Supplier Corrective Action Reports to improve quality standards.
5. Participate in process validation and provide input on statistical methods and test methodologies.
6. Maintain Quality Plans throughout the product lifecycle, ensuring adherence to quality standards.

🎓 EDUCATION

Bachelor of Engineering in Electronics

📅 Feb / 2015-Feb / 2018

University of California

📍 Seattle, WA

Focused on electronics design, automation systems, and control engineering.
