EXPERIENCE

Jr. Senior Etl Informatica Developer
ABC Corporation - JANUARY 2015 – MAY 2015

- Proposed to retire the legacy system and move all the Medicaid enrollment details to new system CURAM.
- Medicaid card and Eligibility flat files are generated to send to MMIS for Medicaid benefits.
- Sourced data comes flat files, DB2 databases, and external feeds, and data is extracted.
- Discussed the business requirements with State resources in determining MedicAid Eligibility.
- Developed Informatica mappings, sessions, workouts, and workflows to extract Human Demographics.
- Created ETL mappings to migrate data from the legacy ANSWER system to the CURAM system.
- Transformed and Loaded into Staging tables and move ultimately to Target databases.

Senior Etl Informatica Developer
Delta Corporation - 2013 – 2015

- Project Details ---------------------- Cox ATLAS migration project - Cox communications Atlas program was initiated to support Cox Businesss goal of growing to a high-performing organization with $2 Billion in annual revenue by 2016 and focuses implementing a SFA/CRM and Order Management solution as the basis for a multi-year BSS/OSS transformation program.
- This project is to migrate the data from various Coxs systems like OPTIX & BID, ICOMS (Billing system), CABS into a next generation TOMS system.
- Migrated data includes Billing accounts, Customer accounts, Customer service locations, Orders, Product Instances from 7 different markets.
- Source data comes from a variety of databases and files such as SQL server, Oracle, Flat files, external third party application and APIs and migrated using various ETL tools such as Informatica Powercenter 9.5, Informatica data quality, Metadata manager, Web services for Address scrubbing, UNIX scripts for automation, Oracle staging databases, FTP processes.

- Responsibilities ------------------------ Developing Informatica mappings, sessions, worklets and workflows to extract data from variety of sources.
- Running Informatica Workflows in Advanced mode using Concurrent execution to run multiple instances corresponding to data from multiple markets at the same time.
- Used Informatica power center 9.5.1 to Extract data from various sources like flat files, xml files, Oracle tables, SQL Server tables, DB2 tables etc, Transform and Load into Oracle Pre-stage and Staging tables and ultimately to Target databases.
