Objective

A passionate electrical engineer with over 12 years of experience in analog/digital systems design, great leadership skills and solid track record of delivering various projects eminently. have learned and exercised the entire life cycle of a project; from defining high-level requirements and detailed engineering specs, to design, implementation, and developing verification tools and acceptance criteria.

Skills

Engineering, Software Development.

Work Experience

Associate Senior Member Of Technical Staff

ABC Corporation - 2010 - 2015

- Managed networking design group.
- Maintained a strong technical ability dealing with business and people management.
- Managed 860T device development that added Fast Ethernet to the PowerQUICC product line.
- Principal architect and wrote all of the laboratory bring-up software.
- Handled several customer technical visits.
- Led a joint development project with HP on 100VG program.
- Conducted line-modeling analysis using FFTs and other analog techniques to determine optimal pole and zero placement for a new line equalizer.

Senior Member Of Technical Staff

Delta Corporation - 2006 - 2010

- Multi-disciplinary engineering for several projects including advanced memory devices, display technologies, and sensors.
- Plan and conduct experiments Subject matter expert for semiconductor device physics research.
- Richards performed systems analysis and design activities on both mainframe and client server applications.
- She employed both functional and object oriented methodologies in the development of systems requirements and design.
- She wrote and executed test plans and developed function point counts.
- This is Dummy Description data, Replace with job description relevant to your current role.
- This is Dummy Description data, Replace with job description relevant to your current role.

Education

B.S. EE In EE - (CS University Of Colorado At Colorado Springs - Colorado Springs, CO)
