## Work Experience

### Associate Senior Mobile Developer

**Sprint** - August 2014 - 2020

- Communicated and translated requirements effectively between functional areas and supporting departments. Effectively translate business requirements into high-level design documentation with supervision.
- Identified appropriate data sources, utilize business intelligence tools, and provide an appropriate reporting solution to meet stakeholder needs. Translate disparate internal data sources into a single source data set that is easily reportable.
- Managed own time and deadlines appropriately. Accurately determine task duration and dependencies for own assignments. Communicate status updates to manager on a regular basis.
- Planned and executed testing activities (e.g., unit, integration, user acceptance testing).
- Prioritized assigned issues based on business impact. Troubleshoot and identify root cause of production support issues within established SLA parameter.
- Determined potential impact to data and reporting resulting from projects, enhancements, and production support.
- Applied project life cycle methodology across assigned processes and systems.

### Senior Mobile Developer

**Delta Corporation** - 2012 - 2014

- Roles & Responsibilities Developing webkit browser based mobile app using technologies like Sencha touch, DOJO and PhoneGap.
- Using sencha touch for development to find relevant people for the same social Networking Websites.
- Developed HTML5 Mobile application with HTML5, Java Script, jQuery, JSON and RESTful web service.
- Implemented CSS3, DOM Api, DOJO and Ajax to create a dynamic and interactive experience.
- Utilize Dojo framework for performing front end validations.
- Designed and implementing a Node.js based mobile text and voice messaging app and its cloud backend.
- Developed UI components for email and link sharing of documents and files for a Content Management System using Backbone.js and jQuery.

## Education

Masters in Computer Science Engineering - (University Of Atlanta)
