## PROFESSIONAL SUMMARY

Strategic Senior Process Engineer with 7 years of experience in enhancing manufacturing processes and operational efficiency. Skilled in leading cross-functional teams to implement innovative solutions that optimize production and reduce costs. Committed to applying analytical expertise and engineering principles to drive continuous improvement and exceed organizational objectives.

## WORK EXPERIENCE

Senior Process Engineer Feb / 2020-Ongoing  
WidgetWorks Inc. Denver, CO

- 1. Utilized Six Sigma methodologies to drive continuous improvement initiatives.
- 2. Managed process documentation and ensured compliance with industry standards.
- 3. Trained and mentored junior engineers on process engineering best practices.
- 4. Analyzed process data to identify trends and recommend improvements.
- 5. Implemented lean manufacturing principles to streamline operations.
- 6. Developed process flow diagrams and P&IDs for new projects.
- 7. Conducted feasibility studies for new process technologies.

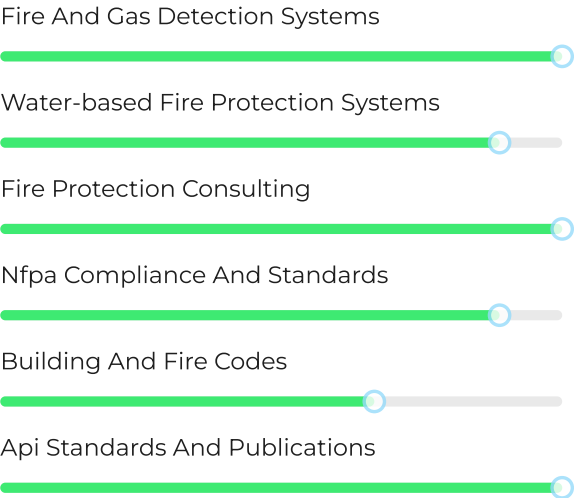

Senior Process Engineer Feb / 2018-Feb / 2020  
Lakeside Apparel Co Chicago, IL

- 1. Maintained all EDM (Electrical Discharge Machine) fixturing and developed and implemented the manufacturing processes for 25 EDM operations.
- 2. Reduced manufacturing losses from \$497K to \$255K in the last five years.
- 3. Developed and conducted yearly EDM process training (40 operators) and established best practices.
- 4. Reduced aged work in process from \$920K to \$550K inventory carrying cost in a 2-year span.
- 5. Designed and implemented an electrode inspection block reducing part nonconformances and electrode usage by 15%.
- 6. Utilized optical gaging machine to evaluate dimensional quality of parts and trained operators how to verify parts with it.

## EDUCATION

Bachelor of Science in Chemical Engineering Feb / 2016 Feb / 2018  
University of Texas Denver, CO  
Focused on process design, thermodynamics, and fluid mechanics.

## STRENGTHS

- Intuition
- Leadership
- Listening
- Mentorship

## LANGUAGES

## ACHIEVEMENTS

- Achieved a 25% reduction in operational costs through process reengineering and waste minimization.
- Led a cross-functional team to successfully implement a new manufacturing protocol, increasing product yield by 15%.
