ROBERT SMITH

Associate Site Engineer

info@qwikresume.com | LinkedIn Profile | Qwikresume.com

A motivated, adaptable and responsible Associate Site Engineer seeking a position in civil engineering that will utilize the practical, organizational and management skills developed through my involvement in the previous career. A clear, logical mind with a practical approach to problem-solving and a drive to see things through to completion.

EXPERIENCE

Associate Site Engineer

ABC Corporation - JULY 2004 – JANUARY 2006

- Daily site inspection performing geotechnical reporting on pile driving and progress.
- Managing and coordination at the construction site with different contractors.
- Works with individual project managers and project engineers to develop budgets, schedules, and plans for the various elements of a program or project.
- Inspect the construction site to monitor progress and assesses conformance to engineering plans, specifications and construction standards.
- Manage and help staff members in construction, operations, or maintenance activities at the project site.
- Deep foundation and pile driving monitoring. Monitors construction schedules with project and contractor schedulers to keep on track and to address problems that may cause delays.
- Assists the PM with the monitoring of day-to-day construction and construction-related activities for all on-site project personnel relative to Safety, Quality, Schedule and Contract Compliance.

Site Engineer

ABC Corporation - 2003 – 2004

- Responsible for site engineering duties including the setting out and surveying of sites.
- Responsible for site management, including HSE, managing workforce and liaising with external consultants - leading the decision making and implementation of any changes on site.
- Surveying and setting out of large construction projects.
- Day to day management of site operations including the supervising of workforce and trade.
- Delivering site-specific HSEQ induction training.
- Ensuring regulatory and standard compliance to HSE - Interpreting engineers and architectural drawings and identifying and implementing changes.
