Objective

More than 10 years of Progressive IT experience in Database Design, Development, and maintenance using MS SQL Server 2012, 2008R2, 2008, and 2005 in Production and Development Environments in various domains. Over 3 Months of Experience as a Salesforce Developer on the current project. Ability to take ownership and responsibilities and work with minimum supervision.

Skills

Designing database tables and structures, Creating Views, Stored procedures.

Work Experience

SQL Database Developer

ABC Corporation - October 2007 - February 2009

- Work-Performed Redesigned database objects like stored procedures, tables, views and was successfully able to increase the performance of the queries.
- Designed SSIS Packages to transfer data between servers, load data into database, and archived data file from various heterogeneous sources such as Oracle, Excel, CSV etc.
- Used Complex transformations in SSIS packages with properties like Check Point, package configurations, SSIS loggings as well as custom loggings (using event handlers).
- Created complex queries to automate data profiling process needed to define the structure of the pre staging and staging area.
- Created and implemented Data Warehouse on SQL 2005 Server Analysis Services.
- Optimized MDX queries and expressions that were used for displaying several user defined reports/matrix in a front end BI application.
- Created several KPI's, perspectives, and calculated members that were eventually used in the BI application for reporting purpose.

Sql Database Developer

Delta Corporation - 2006 - 2007

- 7-Eleven, Inc., is the worlds largest operator, franchisor and licensor of convenience stores.
- Project The project was focused on developing a client specific data warehouse that enables the company to speed up on-line order processing, streamlined functions such as customer quotations, pricing, order processing, acknowledgement handling, shipping and invoicing.
- Work-Performed Designed, created, and implemented relational data warehouse based on the business requirements.
- Thorough analysis and testing of database objects such as stored procedures, views, T-SQL statements before deployment to the production server.
- Created complex ETL Strategies to populate the data warehouse/data-mart facts and dimensions.
- Created complex Master-child packages for the ease of handling the process using properties like package configuration, and created custom loggings to create logs.
- Used multiple transformations including fuzzy lookups and fuzzy grouping in the data cleansing process.

Education

M.S. in Computer Science - (Lamar University - Beaumont, TX)
