info@qwikresume.com | https://Qwikresume.com

Professional with extensive and diverse hands-on experience in package engineering, product and process development, technical sales, problem-solving and cost reductions. Team player accustomed to interfacing with all functions within an organization.

2000 – 2004

TECHNICAL DIRECTOR-CO-OWNER - ABC CORPORATION

- Responsible for all technical aspects of finished goods development, process improvement, production, and finished goods testing.
- Solved a major finished goods quality issue of sticky product by working with ingredient suppliers and revising product formulations to use a special grade of corn syrup.
- Instituted new in-process lab testing procedures in order to tighten the finished goods moisture specification.
- Increasing product consistency while reducing product cost by 0.5% annually.
- Identified a new vendor with the capability of producing extrusion dies in half the time and at one-third the cost.
- Allowing the reduction of customer new project lead times by 4 weeks and saving the company $120,000 annually.
- Improved line efficiencies by changing bag sizes to eliminate a lengthy machine change-over when switching between finished product sizes.

1999 – 2000

TECHNICAL DIRECTOR - ABC CORPORATION

- Supervised live digital audio and video for TV/radio and streaming broadcasts by communicating orally and in writing.
- Ensured a smooth weekly operation of broadcast productions with staff and vendors Purchased equipment necessary to produce the show after researching current publications and industry trends.
- Acted as liaison between department heads to ensure seamless communication regarding broadcasts.
- Oversaw audio and video engineers in their duties to correct any errors.
- Lead post-production team in edits for re-distribution of the show to various organizations.
- Set up and strike AV systems onsite in multiple locations for live broadcasts.
- Ensured live broadcasts met syndicated rebroadcast specifications for multiple cable stations.
