Mandarin

🌟 ACHIEVEMENTS

🌟 Automated RF power calibration process, improving efficiency by 30%.

🌟 Developed testing protocols that reduced product failure rates by 15%.

👤 PROFESSIONAL SUMMARY

Detail-oriented Test Development Engineer skilled in developing robust testing frameworks and methodologies. Successfully improved test coverage by 40% and reduced defect rates through innovative testing strategies and tools.

💻 WORK EXPERIENCE

Test Development Engineer

📅 Jun / 2024-Ongoing

Maple Leaf Consulting

📍 Toronto, ON

1. Designed and implemented automated testing solutions for software applications, improving test coverage and efficiency.
2. Developed testing procedures evaluating key software performance metrics using innovative methodologies.
3. Executed test plans and cases, ensuring compliance with client requirements and industry standards.
4. Identified and resolved software defects through rigorous debugging and testing processes.
5. Collaborated with development teams to enhance software functionality and reliability.
6. Created documentation for test procedures and results, streamlining knowledge sharing.
7. Utilized programming skills to develop custom scripts for automated testing environments.

Test Development Engineer

📅 Jun / 2023-Jun / 2024

Silver Lake Enterprises

📍 Seattle, WA

1. Supported the design and implementation of automated test fixtures for various RF testing applications.
2. Contributed to the transition of product lines to international production facilities, achieving significant cost savings.
3. Developed test automation scripts in LabVIEW, enhancing testing efficiency across multiple platforms.
4. Designed comprehensive test solutions for semiconductor processes, ensuring product quality.
5. Automated calibration and functional testing processes, reducing manual intervention by 40%.
6. Specified and collaborated on test activities for incoming wafer and PCB assemblies, ensuring quality assurance.

🎓 EDUCATION

Bachelor of Science in Electrical Engineering

📅 Jun / 2022-Jun / 2023

University of California, Berkeley

📍 Denver, CO

Focused on electronics and software testing methodologies.
