Support Issue Resolution Organizational And Analytical Skills Hand Dexterity.

WORK EXPERIENCE

Test Operator/Analyst

ABC Corporation - 2002 - 2005

- Commended for discovering a discrepancy between documented spec and test equipment spec that led to better yield.
- Received several other accolades for exemplary work and performed optical and tunable laser modules.
- Provided assistance with new product development and descriptions for failures uncovered during testing.
- Training new employees, and mindful communication with customers and relevant data to defect summary reports.
- Develop efficient ways to process computers for resale and follow specific testing guidelines and processes.
- Verify that all computers due for process daily are completed and maintain department logs, records, metrics.
- `{job_description7}`

Test Operator/Analyst

ABC Corporation - 2000 - 2002

- Cleaning down dusty microchips if needed and resetting or update the microchips on to the motherboards.
- Then testing them up ten hours a night into two different machines.
- The first machine test holds eight microchips and lasted up a tell two or three hours.
- If the test fails Id put it in the "Debug," stack.
- When the test passes it runs through the second test machine which holds only four microchips at a time last about eight hours.
- I started off on the assembly line where we as a team would fix on routers for the Sprint Mobile Phone Company close to six months then was promoted to a test operator.
